Scheren mit Hartmetallschneiden

auch unter der Bezeichnung WOLFRAM oder TUNGSTEN CARBIDE (TC) ein weltweiter Begriff. Eine der härtesten Metall-Legierungen, die annähernd Diamant-Härte erreicht.

TC-Scheren sind "das Werkzeug" des Chirurgen und müssen deshalb von dauerhafter, gleichbleibender Qualität sein.

Scissors with TC Cutting Edges

also known as WOLFRAM or TUNGSTEN CARBIDE cutting edges, is a term that is recognized world-wide. This is one of the hardest metal alloy compositions and it approaches "diamond hardness".

TC-Scissors are the surgeon's tool and, therefore, must be durable with lasting quality.

Berger Surgical TC-Scheren zeichnen sich besonders aus durch:

- exzellente Schnitthaltigkeit
- lange Lebensdauer
- 5 Jahre Garantie
- geschweißte Hartmetall-Einlagen
- vergoldete Ringe
- weicher, gleichmäßiger Gang

Berger Surgical TC-Scissors are particularly distinguished due to their:

- excellent cutting properties
- durability
- 5 years guarantee
- welded Tungsten Carbide Inserts
- goldplated rings
- smoother and consistent pressure function

Wellenschliff

Alle TC-Scheren sind auch mit "BS-Wellenschliff" erhältlich. Die Scheren sind auf der unteren Schnittfläche mit diesem "BS-Wellenschliff" versehen. Dadurch wird das Herausgleiten von Gewebe verhindert.

Wave Cutting Edges

All scissors are available with wavy cutting edges ("BS-Wellenschliff"). The scissors have a special grind on the lower cutting edges. This prevents tissue from slipping out.
